Carbon Calf Tops Drumheller Sale

Hereford calves took the major prizes and brought top prices at the fifth annual sale and show of the Drumheller district junior calf club sponsored by the Drumheller and District Agricultural Society Friday, June 2, with over 1,000 in attendance. Daun Buyer of Carbon, a member of the Avondale junior calf club, won the grand championship with his Hereford steer. Daun also won the Robb Hereford ranch trophy for the best calf of any breed.

The grand champion was sold to the T. Eaton Co. for 57½ cents per pound, bringing \$530.15.

Lloyd Halstead brought further honors to the Carbon district by winning the Acme trophy for the best Shorthorn.

Placings in the Avondale club competition are as follows:

Champion, Daun Buyer, special grade; 2, Lloyd Halstead, special grade; 3, Morley Buyer; 4, Balthazer Schmaltz. Showmanship, Lloyd Halstead.

Auctioneer Archie Boyce conducted the sale, while Ed Noad of Claresholm was the judge. N. F. Bell, district agriculturist, Drumheller, organized and launched the various clubs.

Bob Mortimer Funeral Services Held Thursday

Funeral services for Robert Mortimer, 72, an oldtimer of the Carbon district who died in the Drumheller hospital on Monday, May 29, were held from Christ Church, Carbon Thursday, June 1. Rev. J.W. Way officiated at the ceremony and Winter Bros. funeral home of Drumheller was in charge of arrangements. Interment was made in Carbon cemetery.

Pallbearers were Garnet Snell, Jim Snell, Goldsby McCracken, Fred McCracken, Charlie Martin and Charlie Guynn.

Born in Minden, Ont., Mr. Mortimer came west in 1906 and homesteaded in the Carbon district. He later worked as a farm laborer on various farms near Carbon. In February, 1949 he was taken ill and entered the Drumheller hospital, where he remained until his death.

Surviving are two brothers, Mac, Rocky Mountain House, and Jim, Grande Prairie.

In a Kneehill Valley league encounter at Swalwell last Wednesday the Carbon baseball team scored five runs in the 8th inning to blank the home team 5-0. Carbon team displayed some smart fielding in making a triple play in the second inning.

Carbon—E. Fox, G. McLeod, F. Poxon, D. McLeod, C. Thumliert, J. Reid, R. Knecht, D. Poxon, C. Forsch, T. Heath.

Swalwell—Fyten, Hayes, Gerlitz, Wulff, E. Loewen, Beagrie, R. Loewen, Beaton, Boese.

In another league fixture played at Carbon Sunday afternoon against the Trochu nine, the visitors showed plenty of batting power to swamp the home team 19-8.

To Save Millions

Plan Rail
Tunnels To
Protect Tracks

VANCOUVER—A plan to save the railways millions of dollars in British Columbia during years of floods and heavy snows is under consideration.

The Fraser canyon is the trouble spot for Canadian National railways, the tracks winding along the turbulent Fraser river. On the opposite side is the mainline of Canadian Pacific railway.

For years, the bad-weather season has meant isolation of coastal districts from the prairies because of snow or flood-swept lines. Last winter was the worst of the century.

President Donald Gordon of the C.N.R., despite his few months in office, has studied the situation. He summed it up:

"The trouble is the whole darned mountain comes down on top of us every high water."

He said millions of dollars have been spent for maintenance, but he wants to see a system where "we do not have to pay out the money year after year."

The job would cost from \$150,000,000 to \$175,000,000 and would take from 20 to 25 years to complete. It would mean the reconstruction of 42 miles of mainline through the toughest part of the canyon.

Mr. Gordon, here on an inspection trip, hastens to say it will not be started this year or next. But it is of high importance for the future.

The plan, it is understood, calls for a series of long tunnels over which snow and flood waters and rock slides would roar into the Fraser.

Freight traffic is a factor, the engineers say, in any plans for the future. The project will depend on how profitable freight traffic is in years to come.

FUNNY And

OTHERWISE

New Assistant: "I sent a sprig of mint with Mrs. Brown's lamb, sir."

Butcher: "Well, you'd better send a sprig of forget-me-not with her bill."

Teacher: "Yes, Johnny—what is it?"

Johnny: "I don't want to scare you, teacher, but Pop says if I don't get better grades, someone is going to get a licking."

"Is the boss in?"
"No, he's gone out for lunch."
"Will he be in after lunch?"
"No, that's what he's gone out for."

He: "I'd get down on my knees and die for you."
She: "Would you stand on your feet and work for me?"

He: "Is your father rich?"
She: "Rich? He has so many gold teeth that he has to sleep with his head in a safe."

Who was it said: One reason why fathers worry about their sons is because they were once sons themselves?

"Should a man propose to a girl on his knees?"
"Either that or she should get off."

Wives are people who remind us of the carefree lives they swapped.

For the footsteps left behind us On the floors they've freshly mopped.

"Mother, dear, what was the name of that boy I met on holiday—the one I couldn't live without?"

Dyke That Earned Place In History

—Central Press Canadian.
The famed Norwood-St. Boniface dyke built by the toil and sweat of thousands of citizens, stood as a last barrier against the pressure of water when Winnipeg's flood was the highest.

Butter Stocks Up
In Prairie Cities

OTTAWA.—Stocks of creamery butter in nine Canadian cities on May 12 amounted to 18,175,000 pounds as compared with 7,751,000 on the corresponding date last year.

The bureau of statistics reported increased holdings in each of the nine centres except Quebec, Montreal and Vancouver.

Stocks of creamery butter by cities follows, with the totals for the corresponding date last year in brackets. Winnipeg 6,788,000 (792,000); Regina 709,000 (96,000); Saskatoon 213,000 (169,000); Edmonton 2,064,000 (268,000); Calgary 572,000 (158,000); Vancouver 543,000 (578,000).

Federal Aid For
Alberta Hospitals

OTTAWA.—Federal grants totaling more than \$155,800 have been approved to aid four Alberta hospitals to increase their accommodation, the Health Department announced.

They are the Provincial Mental Hospital, Ponoka; the Provincial Training School, Red Deer; the Provincial Mental Institute, Oliver and the Bentley Municipal Hospital.

SASK. MOTORISTS
ADVISED TO
GET "PINK SLIPS"

REGINA.—"Pink slips", required as evidence of the financial responsibility of motorists driving in Manitoba and B.C., can be obtained by writing to the Saskatchewan government insurance offices at Regina, Saskatoon or Prince Albert, a bureau of publications release said.

Motorists visiting outside the province were also advised to get a letter from the insurance office even if they do not plan on entering Manitoba or B.C.

Most provinces and states now have financial responsibility laws under which a car involved in an accident can be impounded if the driver can show no proof of insurance.

Motorists writing for these credentials should quote licence number, serial number, make, model and year of their vehicle, and indicate in which province they wish to travel.

CHANGED HIS MIND

WINDSOR, Nfld.—A nine-year-old boy sat on the railroad here and defied an approaching train. He calmly sat on a rail and beckoned the engineer, who frantically applied the brakes, to "come on". Then as the train halted he ran away.

Milk Production
Shows Increase
In Alberta

EDMONTON.—Milk production in central and northern sections of Alberta continued to show substantial increases for the month of April, resulting in provincial increases of 11.7 per cent. in creamery butter and 9.7 in cheddar cheese manufactured, said the monthly report of the dairy branch.

For the first week of May butter-fat receipts at creameries were below those for same week of 1949, and feed conditions may be a factor as well as the recent five-cent reduction in the floor price of butter, added the report.

April butter production in Alberta was 2,288,000 pounds, an increase of 239,000 over the 2,049,000 pounds made during April of last year. Cheese production for the month was 226,000 pounds, an increase of 20,000.

Butter stored at Edmonton on May 1 was 2,318,000 pounds.

CANADIAN COAL

Alberta produces 50 per cent. of Canada's coal.

SENATOR SUGGESTS
WORLD GOVERNMENT

OTTAWA.—A white-haired 74-year-old western senator urged the upper chamber to back the idea of a single, unified government of all freedom-loving countries as a means to obtain 100 years of peace.

Senator T. A. Crerar (L—Manitoba) said if civilization is to be saved, then the world had to act quickly for the "sands are running out" and a third world war soon may come.

**SOUR CREAM
BUNS**

● It's such a thrill to make new yeast treats — now you haven't to worry about yeast that stales and weakens! Fleischmann's Yeast keeps full-strength, fast-acting without refrigeration. Get a month's supply.

SOUR CREAM BUNS

● Scald 1½ c. milk, ½ c. granulated sugar, 2 tps. salt and ¼ c. butter or margarine; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Royal Fast Rising Dry Yeast. Let stand 10 minutes. THEN stir well.

Sieve ½ c. cold mashed potato and mix in 2 unbeaten egg yolks and ½ c. thick sour cream; stir into yeast mixture and stir in lukewarm milk mixture. Stir in 3½ c. once-sifted bread flour; beat until smooth. Work in 3 c. (about) once-sifted bread flour to make a soft dough; grease top. Cover and set in a warm place, free from draught.

Let rise until doubled in bulk. Punch down dough, grease top, cover and again let rise until doubled in bulk. Punch down dough and turn out on lightly-floured board; roll to ½" thickness and cut into 3¼" rounds and place, well apart, on greased cookie sheets. Using a floured thimble, make a deep depression in the centre of each bun. Brush rounds of dough with mixture of 1 slightly-beaten egg white and 1 tbs. water; sprinkle generously with granulated sugar. Cover and let rise until doubled in bulk. Deepen depressions in buns and fill with thick raspberry jam. Bake in hot oven, 425°, about 15 minutes. Yield — 3 dozen large buns.

Canadians Increasing Their Savings

Thrifty And Slow To Risk Capital

SEIGNIORY CLUB, Que. — Thrifty Canadians have socked away more than \$3,000,000,000 in the last four years. What's more, they're increasing their savings at the rate of \$400,000,000 a year.

This was disclosed by J. E. Coyne, deputy-governor of the Bank of Canada in a speech before the annual meeting of the Canadian Life Insurance Officers Association.

While Canadians are thrifty, they also are cautious, the deputy-governor added. Although this pile of cash together with surpluses accumulating in corporation accounts could be sufficient to meet Canadian investment needs, Canada still is getting much of her investment requirements from foreign sources.

The trouble, indicated Mr. Coyne, is that Canadians are not too eager to get into the risky investment field of developing resources.

They favor more conservative investments such as housing mortgages and the like. This helped Canada, but it was not enough.

Thus, whether Canada needed foreign capital or not, Canada was continuing to receive foreign capital simply because foreign investors had established themselves in Canada and were showing more interest in development than some Canadians.

"Experience of the last few years shows," said Mr. Coyne, "that someone is going to develop the resources and industries of this country, if not Canadians, then Americans, Britons and Europeans.

"One-half of all dividends of all Canadian corporations," said Mr. Coyne, "are paid to non-residents."

The way to bring an end to this export of dollars is for banks and insurance companies who hold at least 60 per cent. of the savings to transmute greater amounts of the individuals' savings into productive investment.

This, then, was the trend for "an increasingly important" role to be played by Canada's insurance companies and banks.

YOU'RE TELLING ME

By WILLIAM RITT
Central Press
Canadian Writer

An irate gentleman was fined for howling back at his neighbors' dogs when they bayed at the moon. In other words, the court put the bite on him for his bark.

A beauty parlor for dogs has been opened in Chelsea, England. We wish it every success but we'll bet Fido would rather get his beauty mud bath while burying a bone.

The St. Louis Browns have hired a psychiatrist to make the team members think they are players. What the Browns really need is someone to make the people of St. Louis think they are fans.

A Canadian community gleefully announces that it has found uranium nearby. Haven't they heard the word is now "h-y-d-r-o-g-e-n"?

This is the season when alcohol is drained from auto radiators. Let's hope the drivers behind same are also empty of the same.

A museum expedition has discovered that by playing phonograph records near them, African lions became upset and short-tempered. Understandable—disc jockey programs affect us the same way.

Things must be returning to normalcy, or nearly so. A movie queen went into a tantrum because her studio wouldn't switch an entire street scene so her left profile instead of her right would show. Or, maybe, it was vice versa.

Chileans should be the world's best jitterbugs since their country leads the world in number of earthquakes.

From 1792 to the end of 1949, the United States minted 319,502,294 pounds of coins. That, it goes without saying, is quite a pocketful of small change.

RETURNING TO HOMES—Farmers of Central Europe are now making a rapid recovery after the derangements of World War II. This picture was taken in Czechoslovakia and shows German refugee farmers returning to their old homes in Bavaria.

Redmen's "Heritage"

Chippewas Of Alberta Finally Sign Treaty With Government

Alberta Tribe Last To Accept White Man's Terms

ROCKY MOUNTAIN HOUSE, Alta.—More than 100 years of wandering has ended for the last of Canada's nomadic Indians—a band of Chippewas who inhabit the wooded foothills near here.

Government officials announced that a treaty has been signed with the Indians and they will be settled on a reservation. The band is the last in Canada to take a treaty.

For generations, the band has refused to accept the white man's terms, but at a meeting between tribe leaders and officials of the Department of Indian Affairs an agreement was reached.

Signing of the treaty was conditional on obtaining provincial land for a reservation. A settlement regarding the land was reached here.

Independence of the Chippewas and their refusal to accept the white man's terms dates back to 1841 when the tribe fought for its existence against the powerful Blackfoot tribe.

Almost always on the move the Chippewas wandered through the valleys of the Nordegg, Brazeau and North Saskatchewan rivers in west-central Alberta. Their existence has been difficult and at times they were near starvation.

Federal officials have sought to improve their lot but the stubborn independence of the chiefs and councilors has prevented signing of a treaty.

Opposition to a treaty was brought to its peak by Chief Jim O'Chiese, known as the "great chief," who died at 107 years.

"God gave us this great heritage of nature," he once said, and on his deathbed he made his son and the latter's councillors pledge that they would never sign a treaty with the white man. That pledge was kept until the treaty was signed.

Representing the Indians in the negotiations was Andrew Strawberry, described as the "principal man" of the band. White men were Malcolm McCrimmon of Ottawa, commissioner with power to sign treaties, G. H. Gooderham of Calgary, regional su-

perintendent of Indians in Alberta, Henry Stelfox of Rocky Mountain House, known to the Indians as their "great white friend," and Cpl. E. C. R. Woods of the R.C.M.P.

SAVES ON COFFEE

Science Produces Pot To Lessen Bitter Taste

NEW YORK—Science has a new kitchen utensil. It is a new-type coffee pot, one that does a triple filtering. The designers call it a tricola-tor because it supposedly gets rid of most of the substances that can make coffee bitter. The main gimmick of the new pot is a silken fiber, paper thin, through which the coffee is filtered. It serves as a middle filter, as the coffee works on a principle of three filters.

The pot works simply. Drip type coffee grounds are placed over a perforated metal tray after the filter fiber has been placed. Over that another metal disc, also perforated, is placed. Then boiling water is poured into the pot.

The top metal disc spreads the water so it drips through the ground coffee at an even pace, and no grounds are left dry. Then the coffee meets the filter paper, where the acids are removed. The bottom perforated disc serves as a control to prevent dripping too rapidly.

The new pot, according to the makers, can be kept over a low gas flame without danger that its ceramic bowl will crack. They also said less coffee is needed, thereby giving the housewife a saving.

To Feel Right — Eat Right

UNDER THE SIDEWALKS OF NEW YORK—Headed for emergency exits, New York subway passengers patiently wend their way along an underground catwalk to stairways after a short circuit completely paralyzed service in the area. More than 8,000 commuters were led to the street by police and trainmen following the mishap. Eight of the passengers were injured slightly.—Central Press Canadian.

Lilac Time

Hybrids Chosen As Best Of 250 Available Kinds

(By Donald Wyman in New York Times)

Since over 250 varieties of lilacs are offered for sale in this country, gardeners often find it most confusing to select the best kinds for their properties. Those that have proved excellent time and again—for many years and in many different soils—merit first consideration. Later than usual, they are now opening their buds throughout the country.

Lilacs generally provide bloom over an eight-week period, from the first of May until the last of June. The Chinese, Persian, Littleleaf and Japanese tree lilacs are all interesting and beautiful. The newer Preston hybrids have considerable merit, since they materially lengthen the blooming period by opening after the common lilac has faded. Many nurseries are now starting to offer these Preston lilacs, for they are hardy, grow rapidly and make splendid specimens.

No lilacs are native to North America. The old-fashioned common lilac (*Syringa vulgaris*) was brought to these shores by the earliest colonial settlers, who knew and loved the plant in their native European countries. The first hybrid lilac originated in 1771 (in France), and since that time other species have been found in various parts of the world, from which many hybrid varieties have been developed.

By far the most popular of all the groups of lilacs is the *Syringa vulgaris* and its many hybrids. This old-fashioned purple kind and its white-flowered variety, both native to Europe, were the only ones originally known on that continent.

With the introduction of new species from other countries, hybrids began to appear with a wider range of colors. Today, they can be separated into seven color groups—white, violet, blue, lilac, pink, magenta and purple. Although this is a rather fine distinction, each of these colors is represented by some hybrid varieties, and lines of demarcation between groups need not be fine.

Double Blossoms

The hybrids are noted also for double as well as single blossoms. Both kinds will be found in named varieties of each color group.

The greatest lilac hybridizer of all time was Victor Lemoine (1823-1911), a French nurseryman to whom gardeners all over the world owe a great debt. Hundreds of new varieties of many kinds of plants resulted from his hybridizing experiments in his own nursery. When he died, his sons continued the work.

Because of the large number of lilacs introduced by M. Lemoine, the term "French hybrids" has been loosely applied to all the hybrid lilacs, regardless of where they originated. Actually, plant breeders in many countries, including France, Belgium, Germany, England, Canada and the United States, have contributed to the varieties that are grown commercially today.

High pressure steam has been produced hot enough to light a cigarette.

On The Side -By- E. V. Durling

THE CONSIDERATE MATE

"I wish to strongly disagree with that woman who advised girls not to marry a man who is the only son in the family and has a lot of sisters," writes a Chicagoan. "My husband has seven sisters and none could ask for a better husband than mine. He is just as sweet and considerate as he can be. I think a man who has a number of sisters has the advantage in that he doesn't feel women were put on earth just for him, but really that they are human beings too. Sisterless males are inclined to think they are God's gift to women. They lack the tolerance and understanding that men have who have been fortunate enough to spend their early lives in a predominantly female household."

IT'S A TRAP!

Do mosquitoes fall in love? Possibly that is something to which you have never given a thought. However, scientists believe love figures largely in the life of the mosquito. Their experiments indicate the female mosquito gives voice to a "mating song" which the mate of the species finds impossible to resist. With this in mind, the scientists are having recordings made of the love song of the female mosquito. These recordings will be used to lure the male mosquito into traps where they will be promptly exterminated. Or so the men of science believe. It may be that the mosquitoes will not fall for the recorded love song. You cannot fool a dog with a record or radio broadcast. The mosquitoes may be equally clever.

BARBARIC EVENT

Note the Liverpool Grand National steeplechase referred to as a "barbaric event". I am in accord with this description. Every year a number of horses are injured or killed in this race. Veterinarians are posted at the principal jumps prepared to "humanely destroy" injured horses. This year 49 horses started in the Grand National. Only seven finished. The horses that broke their legs were, of course, "humanely destroyed". Yes, sir, the Grand National is truly a barbaric event. It is almost as bad as a bullfight insofar as cruelty to animals is concerned.

THE THREE TYRONES

Tyrone Power is to star in the play "Mr. Roberts" in London. He is the third generation of stars in his family, all using the stage name of Tyrone Power. The first Tyrone Power, his grandfather, was born in the county Waterford, Ireland, and was the leading Irish comedian of the Drury Lane theatre, London. The present Tyrone Power's father was born in London and was a star on both stage and screen. Tyrone himself was born in Cincinnati.

No Moose Hunting In Alberta, 1950

Mysterious Migration Reason For Protection

EDMONTON. — There will be no moose hunting in Alberta this year, E. S. Huestis, provincial game commissioner, announced.

Mysterious migration of the large animals to southern foothills in the province where there is less protection against hunters is given as the reason for the ban. In other years the moose have inhabited the north bush country. The cause of the migration which has occurred in Alberta and British Columbia this year has not been solved by biologists and naturalists, according to game officials.

Mr. Huestis also stated that according to the order-in-council passed recently caribou hunting also will be banned this year. Poor wintering has caused a decrease in the herds, and it has been decided to give the animals sufficient time to increase.

The bag limits this year for other animals are one male mountain sheep, one male or female mountain goat, one either male deer or male elk, one grizzly bear and one black, brown or cinnamon bear.

Either one male or female elk can be taken in the Pincher Creek area, south of the Castle and Old Man Rivers and west of highway No. 2 between Macleod and Cowley.

The open seasons in the province are: Sept. 15 to Oct. 31 for sheep and goats; Nov. 1 to Dec. 15 for deer and elk, and Sept. 15 to Dec. 15 for bears.

Mr. Huestis also said that hunters applying to the department for special permits will be allowed to shoot deer or elk during the open seasons on sheep and goats in the Athabasca, Brazeau and Clearwater forest reserves. There is no change in the fees for hunting permits.

Fashions

NEW DESIGN

Saunders-Roe, Limited, of Cowes, Isle of Wight, England, announced a new jet flying boat design it expects to carry 74 passengers at 500 miles an hour.

WORLD HAPPENINGS

BRIEFLY TOLD

Hungary's supreme court of justice refused to cut the 15-year-prison sentence of Robert A. Vogeler, American business man who was convicted last February on spy charges.

Canada's navy, now more than 9,000 strong, has more men at sea proportionately than either the United States or British navies, Hon. Brooke Claxton, defence minister, said.

British boys and girls, conscious of their country's air-jet prowess, are demanding that their 1950 fiction should be jet-propelled. London librarians report a great demand for modern scientific stories.

The Crown Trust company paid the Alberta government \$1,611,711 for oil rights on a single quarter section of land in the Redwater oilfield, shattering all previous price records on government reserves.

A man carrying a "We Want Peace" banner appeared outside Clarence House, the official residence of Princess Elizabeth as she was sunning baby Prince Charles in the yard. A park keeper halted him and police took the man away.

The British Ministry of Health has told a London borough council that it spent too much on entertainment of officials at a ceremonial opening of a new apartment block. Guest of honor at the ceremony was Aneurin Bevan—Minister of Health.

KITCHEN MEDITATIONS

DON'T PASS IT ON!

By JANE DALE

You have heard the latest gossip; Tales about some fallen one. All the facts may not be truthful. So please don't pass it on!

Someone may be struggling vainly To overcome some foolish deed. By you not repeating gossip You may be a friend indeed!

For the tale thoughtlessly carried Bodes the guilty one more ill. Rather than add to her misery Try to keep your quick tongue still.

If you hear some spicy gossip, Help that story die away; Help someone regain her virtue; Do not breathe a word today!

NEW RECORD IN CAR SALES SEEN

EDMONTON. — New car sales in Canada last year will hit a record mark of well over 300,000, S. S. Rafuse of Bridgewater, N.S., president of the federation of Automobile Dealer associations of Canada, said at the annual meeting of the northern Alberta branch.

Forgers once were punished in Milan by being buried alive or having the right hand amputated.

Weekly Tip

USE FOR FELT

Don't throw away old felt hats. Cut them up and paste them on the bottom of heavy ornaments and flower pots to prevent table scratches.

In background can be seen one of the artillery pieces in the shipment.—Central Press Canadian.

Archaeological Discovery Shows How Early North Americans Lived

By RICHARD S. BLOCH
(Central Press Canadian
Correspondent)

COLUMBUS, O.—The recent finding and exploration of an Adena Indian house site six miles south of Wilmington, O., has been called one of the most important archaeological contributions in North America of the last decade or so.

A model of the house used by the prehistoric Indians of this continent has just been completed and put on display at the museum of the Ohio State Archaeological and Historical society, in Columbus.

These people, who inhabited this continent about 400 A.D., settled in what is now Ohio, Kentucky, western Pennsylvania, northern part of West Virginia, eastern Indiana, and southern Michigan. This was the first Adena house site ever to be found in Ohio. Kentucky is the only other state where such a discovery has been made.

The Adena Indian was the first group to build burial mounds. They also had the strange religious custom of burning their homes when the head of the household or clan died.

In some instances they would burn the house first, then bury the deceased in the floor or in a central pit, building a mound over the ruins and tomb. In other instances, they placed the body on the floor of the still standing home, built a low mound over him, and then burned the house over it.

As time went on they made further burials on top of the mounds causing them to grow in size.

When the expedition from the Ohio State Archaeological and Historical society set out, they did not expect to make such a significant discovery.

Their mission had been to excavate an Adena type mound which was in a valley soon to be covered by water in a flood control project. These mounds usually contain many burials but no house sites.

In the course of the excavation the men, directed by Raymond S. Baby, curator of archaeology, found 17 skeletons, along with burial objects of shell beads, copper bracelet, etc., before they came upon the first clue to the house site, a gravel ring.

This was the dirt from the centre burial pit. Working away from this gravel ring the explorers found a circular pattern of holes made by the wall posts of the house. The holes were arranged in pairs and each was five to six inches in diameter.

The distance between each pair was four and one-half feet. It was

Model of House Used by Pre-historic Adena Mound Builders in Ohio.

reasoned, by the burnt area around and outside of the house site, that the wall posts were 12 feet in height. When the house had gone up in flames the walls fell and left the burnt area.

Between the circular pattern of outer holes and the central portion were additional post holes, presumed to be from extra roof supports and perhaps household furniture such as racks for drying skins, bed supports and the like.

Evidence indicated that the central portion of the house had been 24 feet high, twice as high as the walls. The Indians used a three-sided screen opposite the doorway to catch the wind, which carried the smoke from their fire up through the hole in the roof.

Also found in the area were charred pieces of bark presumably used for the roof of the house. In addition, some foodstuffs were found, also mussel shells, hickory nuts and cracked animal bones, primarily of deer. There were also found some needles and bone awls.

The burial pit was eight by seven feet wide and three and one-half feet deep. The Adena had lined the base with bark, and on the bark spread a one-half to three-fourths inch layer of greenish-gray clay. The remains of the adult male individual wrapped in a fabric, had been placed on this.

Impressions of the fabric were found in the clay and bits of it were preserved on the copper bracelets that had been put on each wrist. A string of 125 shell beads were around the neck.

Another layer of bark had been put over him and covered with six inches of yellow clay. The top of the pit had been covered by logs and a mound constructed over the entire burial. Additional burials had been made on the mound, which at the time of excavation was 87 feet in diameter at the base and 17 feet high. It was cone shaped.

It is believed that two or three family groups had lived in this particular house which was 45 feet in diameter. The Adena Indians usually lived along secondary streams and a village was composed of about three to five houses.

These prehistoric people were sub-medium to medium height and had round heads and broad flat faces. Their ancestors presumably had come across the Bering Straits and had travelled down the west coast of Canada and into the southwestern area.

One group came east to the Mississippi valley. The bulk of the Indians moved up the valley and most of them settled in what is now known as the Ohio area, where the Adena culture seemed to develop.

SELECTED RECIPES

DATE AND NUT LOAF

1 cup of sugar
1/2 cup of butter
2 eggs
1 cup milk
2 cups dates, stoned and chopped
1/2 cup chopped walnuts
3 cups of flour
1 teaspoon salt
3 teaspoons baking powder
Cream butter and sugar, add beaten egg and beat thoroughly.
Add part of the flour, then the milk, dates and nuts.
Add remainder of the flour in which the baking powder and salt have been thoroughly sifted.
Bake in a greased loaf tin in a moderate oven of 350 degrees F. for about 40 minutes.

SOUTHERN PIE

3 cups cooked, diced ham
1 cooked cauliflower
1 tablespoon minced onion
2 cups cooked tomatoes
1/2 teaspoon thyme
1/2 teaspoon salt
1/2 teaspoon pepper
1/2 teaspoon red pepper
1 tablespoon flour
Pastry crust
Arrange ham and cauliflower divided into flowerlets, in a baking dish. Brown onion in fat. Add tomatoes, thyme, salt, pepper and red pepper to onion mixture.
Cook 5 minutes and strain. Thicken with flour. Pour over ham mixture in baking dish. Cover top of dish with pastry crust. Bake in a hot oven (425 degrees F.) for 30 minutes, until crust is brown.

Farm Implement Sales Hit New Record In 1949

Sask. Tops Provinces

OTTAWA—Canadian farmers went on a buying spree last year to boost the sale of new farm implements and equipment to an all-time peak of \$220,710,000.

The Dominion Bureau of Statistics states that the 1949 sales were 29 per cent. higher than the preceding year's \$170,666,000 mark and 78 per cent. above the 1947 total of \$122,395,000.

Sales of spare parts showed a more moderate advance, rising to \$27,709,000 from \$26,997,000 in 1948 and \$23,276,000 the year before.

All provinces except the Maritimes shared in the expansion of new equipment sales during 1949. The total for Saskatchewan—largest among the provinces—advanced from \$46,508,000 in 1948 to \$59,977,000 last year. Totals for other provinces, with 1948 figures in brackets were:

Ontario \$49,382,000 (\$38,453,000); Alberta \$45,532,000 (\$36,748,000); Manitoba \$37,993,000 (\$23,369,000); Quebec \$17,133,000 (\$14,907,000); and British Columbia \$5,360,000 (\$5,222,000). Sales in the Maritime provinces fell slightly to \$5,333,000 from the \$5,461,000 total of 1948.

Spare parts sales, with 1948 figures in brackets, were: Alberta \$6,373,000 (\$6,754,000); Saskatchewan \$8,750,000 (\$8,363,000); Ontario \$5,314,000 (\$4,996,000); Manitoba \$4,060,000 (\$3,909,000); Quebec \$1,983,000 (\$1,826,000); the Maritimes \$708,000 (\$660,000); and British Columbia \$511,000 (\$490,000).

GEMS OF THOUGHT

WORLD PEACE

The next great task of humanity is not deliverance by the sword, but deliverance from the sword.—David Lloyd George.

A steadfast concert for peace can never be maintained except by a partnership of democratic nations.
—Woodrow Wilson.

Our whole social life is in essence but a long, slow striving for the victory of justice over force. — John Galsworthy.

The only solid thing in this vast universe is love. — James Greeman Clarke.

War will never yield but to the principles of universal justice and love, and these have no sure root but in the religion of Jesus Christ.—William Ellery Channing.

The peace of Love is published, and the sword of the Spirit is drawn; nor will it be sheathed till Truth shall reign triumphant over all the earth.—Mary Baker Eddy.

NOT NEW

Radiant heating is not news. The Romans some two thousand years ago circulated heated air beneath floors to give a warm surface.

You can't drift into success.

FOR LUXURIOUS COATS—Ladies who look with envy at luxurious mink coats in expensive store windows do well to thank the little animal whose coat provides lively, durable and versatile fur, as well as the countless men from all walks of life who live a Jekyll and Hyde existence for two or three weeks of the year to provide it. When the creeks and marshes come alive, when the little animals begin to scramble out of their houses to woo and win their mates, then the trek of the trapper begins. One of these trappers is Gerald Thompson who has been helping his father and his uncle with their spring muskrat trapping in McGillivray Township in Western Ontario.

Border Permits To Be Valid Till 1951

(By The Canadian Press)

WINDSOR, Ont.—All border-crossing permits for automobiles of Canadian travellers to the United States will be valid until March 31, 1951, it was announced by Edgar Wackett, collector of customs here.

The ruling thus makes regulations the same as they were before March 22. At that time an Ottawa announcement said a permit would have to be made out each time a traveller drove into the United States, with the exception of commuters.

There was opposition to this ruling, and the permits were made valid for a six-month period. Now they have been extended to a yearly basis. The permit, one copy of which is held by the Customs Department, shows the license number of the vehicle, its serial number and lists all accessories.

TRY AND STOP ME!

By BENNETT CERF

A millionaire decided to build a luxurious bungalow on his mountain retreat. A famous architect gave him a set of blue prints, and he sent them on to the local handyman to execute. When he arrived at his place the following summer, however, he found that not a single lick of work had been done. "I wasn't gonna throw away your good money," the native explained. "A lunatic musta drawn up them blue prints for you. Why, he put in two bathrooms."

A young man just home from college was dawdling over a second cup of coffee one Sunday morning, reading The Canterbury Tales, when his father demanded, "What have you got there?" The lad answered airily, "Just my cup and Chaucer."

Smile of the Week--

Woman customer (after the clerk had pulled down blanket after blanket until there was only one left on the shelf) "I don't exactly want to buy a blanket today. I was only looking for a friend."

Clerk: "If you think he's in the other one, madam, I'll gladly take it down for you."

Helpful Hints

To avoid accidents, equip tubs and showers with non-skid rubber mats.

If you store woollens for the summer in heavy paper bundles, seal all paper edges with gummed tape.

Plastic eventually discolors from the effect of heat and sun. If your plastic curtains, tablecloths, etc., turn yellow, there is nothing you can do to restore the original color, so make use of them in some other way.

Commercial salt is mainly manufactured from rock salt and natural brine.

Lawn Swing For Children

The above are drawings of a home-made lawn swing. The swing can be made by anyone handy with carpenter's tools and if well made, it will last for many years.

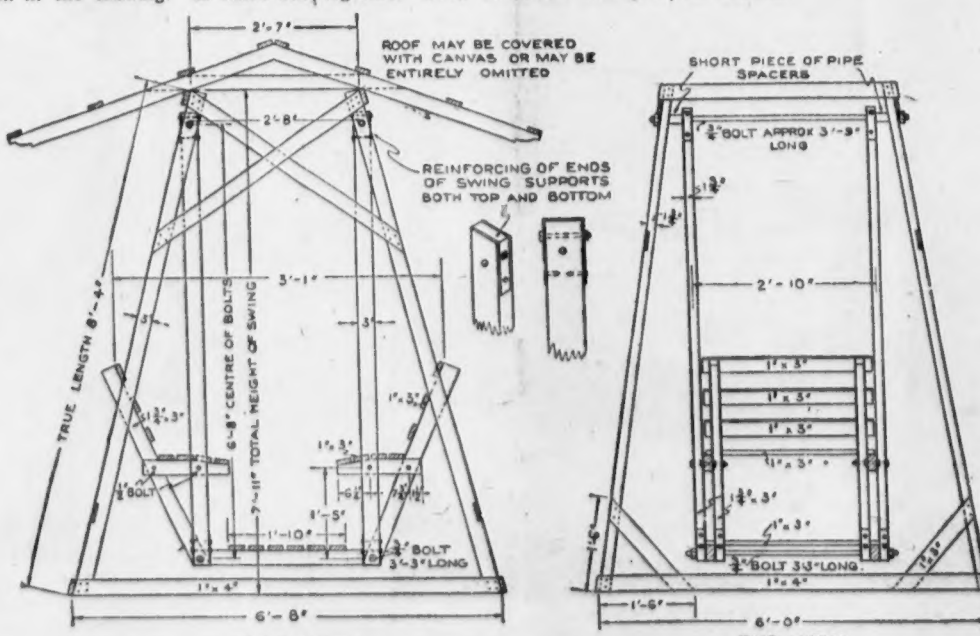

If the swing is made of soft wood lumber such as spruce or B.C. fir, pieces should be of the dimensions given in the drawing. If made out

of hardwood, such as birch, material will be strong enough if made somewhat lighter. While nails can be used to nail the braces and runners to the uprights screws will hold better and make a stronger job.

For projects such as this it is best if all parts are given one or two coats of paint before they are put together. Such treatment will pre-

vent water from getting into the wood between the joints, making for increased resistance to decay.

While the roof is not necessary for a swing of this kind, it does add greatly to its appearance, provides shelter for youngsters using the swing on a sunny day and also does much to protect the woodwork from the weather.

SIDE VIEW

END VIEW

Anyone handy with tools shouldn't have difficulty building a lawn swing from these drawings.

Couch Grass Control Is Big Problem

Couch Grass or Quack Grass control presents one of the toughest weed problems in Western Canada. Intensive cultivation is still the only effective way of controlling large infestations of this creeping perennial grass weed. A brief description of two common but distinctly different cultural methods of fighting Couch Grass is presented here.

Method 1. This is the older method of Couch Grass control. It is based on the principle of exposing the lower stems and roots to the drying effects of wind and sun during the hot, dry, midsummer period. It involves shallow plowing, starting in mid-June, followed by repeated and deeper tilling as the season advances. The persistent use of the duckfoot or spring-toothed cultivator is necessary in order to bring the entire stem and root system to the surface.

Method 2. The object of this newer method of Couch Grass control is to starve the plants to death—a matter of exhausting the food supplies which are stored in the roots. It means repeatedly cutting-off the green portions of the plants. The one-way disk is a particularly effective implement for this purpose. If the disks are kept sharp they will penetrate the toughest of sods, and make a thorough 'cut' at shallow depth. Diskings should commence about mid-June and continue at intervals of not more than two weeks during the summer and fall months.

Whatever cultural method is adopted, systematic, well-timed cultivations are necessary for success. Copies of our new circular, "Couch Grass Control by Cultural Methods" may be obtained, free of charge, through local Line Elevator Agents, or directly from Line Elevators Farm Service, Winnipeg, or Calgary.

MANITOBA FLOOD RELIEF FUND. Have you made your contribution to this national emergency fund? If not, do it today.

Any way, and every way, you measure it — FIRST... and Finest... at Lowest Cost!

• Yes, it's easy to identify the *best buy* in cars when the margin of superiority is as clear and overwhelming as it is in the new 1950 Chevrolet!

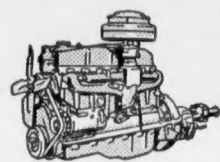

Measure *size*, and you'll find Chevrolet's the longest, heaviest car in its field — *bar none*. Measure *styling and beauty*, and you'll find it's the only car in its field with the world-famous Body by Fisher. Measure *performance, riding-comfort and safety*, and you'll find it's the only low-priced car combining the extra-efficient Valve-in-Head Engine, the extra-smooth Knee-Action Gliding Ride, and extra-dependable Certi-Safe Hydraulic Brakes!

And remember — Chevrolet alone provides all these and many other fine-car advantages at the *lowest prices* and with such low operating and upkeep costs.

Come in! See Chevrolet for 1950. And we know you'll agree that, any way and every way you measure it, it's *first and finest at lowest cost!*

HIGHLY IMPROVED, MORE POWERFUL VALVE-IN-HEAD ENGINE! WITH POWER-JET CARBURETOR AND LARGER EXHAUST VALVES

The fine Chevrolet engine is now made even finer... bringing you more power, faster pick-up, greater over-all performance... plus the outstanding economy for which Chevrolet has always been noted. New Power-Jet Carburetor not only improves performance, but provides faster warm-up — saves gas! Better low-speed performance and improved operation

on hills are further features of this great new version of Chevrolet's world's champion Valve-in-Head Engine.

and traditionally bringing you *more value* when you trade; for Chevrolet cars are *most wanted* — new or used.

OUR COMPLETE SHORT STORY—

The Wager :: People Should Be More Careful.

By Charlotte McCarthy

"YOU'RE pretty sure of the guy, aren't you, Anne?" The speaker, a tall, blonde girl whose complete absence of expression took away all the charm of her flawless skin and perfect features, neatly snuffed out a cigarette.

"I am very sure of Joe," Anne wished Kay wouldn't talk like this. These last few months since she had agreed, against her better judgment, to let the girl share her apartment, there had been so many hints dropped, which, while they hadn't shaken her faith in Joe, had made her vaguely unhappy.

"If I had a fellow in another city, particularly one with wandering eyes like Joe, I'd be prepared for the worst." With an expressive shrug of her shoulders, she touched the brief flame of her lighter to a fresh cigarette.

"I wouldn't say that Joe was the type to flirt, and you should know that, if you remember what happened the night I introduced you to him." There was a double meaning in Anne's remark that the other wasn't slow to sense.

"Oh, I try my luck with every man I meet. Finders keepers. You didn't expect him to show any interest in me, no matter how he felt, did you, with you in the picture? I thought you said he never missed a week writing to you. This is Saturday, and I haven't heard of you getting a letter."

"There'll be one. The postman hasn't called yet." Why did Kay try so hard to undermine her faith in Joe?

"Just for fun, Anne, I've got a five dollar bill that says there won't be a letter." Kay flipped the money from her purse and threw it on the table.

Anne caught her full lower lip between even white teeth. Joe might miss writing, even though there hadn't been a week since he'd gone away that she hadn't heard from him at least once. Five dollars meant nothing to Kay, whose father sent her a generous check each month. Anne thought of her next-to-last pair of nylons drying in the bathroom, of the appointment with the dentist next week, and then, ashamed of her hesitation, she opened her bag, and drawing out the lone bill, smoothed it out on the table. "No letter from Joe today and this is yours, my friend," she said airily, with more confidence than she felt.

"What a town!" Lazily, Kay stretched a white arm above her head. "Nothing ever happens here." "If you had to work as hard as I do, you wouldn't worry too much about it."

"Oh, work." Kay dismissed the subject as if she found it extremely distasteful. "Wait! There's the postman."

With maddening deliberation, the wiry little man in blue made his way

down the street, and came up the walk to their building. It seemed an age before they heard him finish his work in the lower hall and the door swinging smartly closed behind him.

"I'll get it." Her heart pounding, Anne hurried down the stairs.

Her hand shook, as she fitted the tiny key in the lock. A brilliantly-colored circular, a postcard from a girl who was spending a week in Bermuda, a letter for Kay. And that was all.

Slowly, her face flaming, she walked back upstairs, and handed the letter to Kay.

"Who wins, Anne?" Anne averted her glance from the barely concealed triumph in the other's eyes. "It's all yours. But it is the first time that Joe..."

"There's always got to be a first time. You small-town girls amuse me, you still believe in Santa Claus."

The long day stretched ahead. Maybe Kay was right. Perhaps she should be prepared for the worst. She didn't hear the heavy step on the stairs, until there was a sharp tap on the door.

"Everybody dead in there?" No mistaking that voice; it belonged to a woman who lived down the hall. "This here got put into my box by mistake. People should be more careful!" The door opened abruptly, and a plump white hand holding a thick envelope appeared.

With a suspicious moisture in her eyes, Anne took the letter.

"Count your money again, Kay," she said softly. "You're ten dollars short."

Says B.C. On Verge Of Great Expansion Period

NEW WESTMINSTER.—B.C. is on the verge of an expansion never before known, Premier Johnson said in speaking of impressions conveyed by Donald Gordon, Canadian National Railways president.

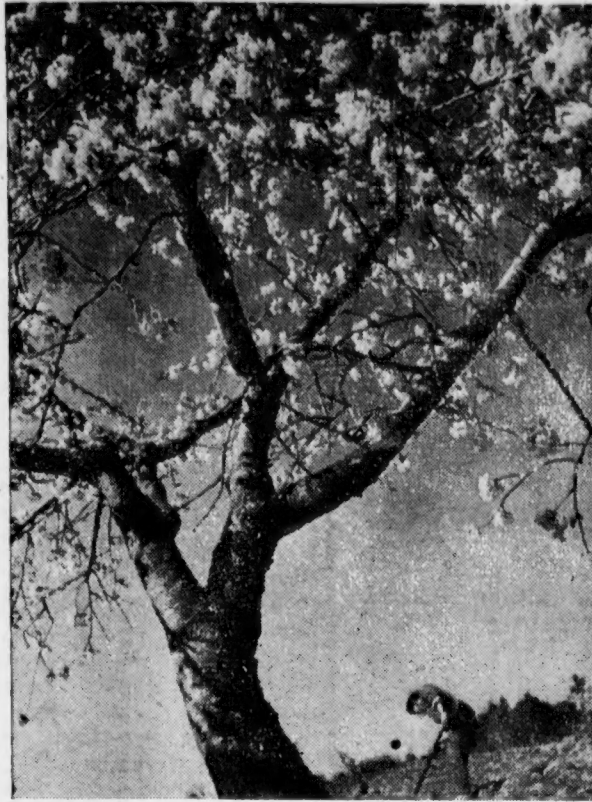

He told New Westminster Liberal Association that Mr. Gordon was impressed with a visit to Prince Rupert by development of the cellulose industry at nearby Port Edwards.

Premier Johnson voiced hope that the plant there will be in production by the end of the year.

He said there are now 49 oil companies which have taken out leases in B.C. in stating that "we hope to have oil in the Peace River."

COSTLY PIPELINE

Over 1,000 men and millions of dollars' worth of equipment are massed along the route of the Edmonton to Great Lakes pipeline.

Nature Paints New Face On Earth

Trees and flowers are bursting into bloom in parts of Canada from Okanagan to Annapolis Valley. Cold spring weather has retarded flowering for an average of two weeks. Thousands of visitors are touring the countryside, fascinated by the beauty and fragrance of the fruit and flower blossoms.—Central Press Canadian.

B.C. RESIDENT**Makes 1,000-Mile Trip To Get Sawmill Belts Spliced**

STURGIS, Sask.—Fred Tymrick, of Arrowhead, B.C., motored 1,200 miles to Sturgis recently, to have five sawmill belts spliced here by William Hrushka, local harness and shoemaker.

Mr. Tymrick's trip to get the belts spliced took him to Vancouver, Revelstoke, Nelson and Calgary, with negative result. He phoned Mr. Hrushka, who informed him that he would do the job.

Mr. Tymrick left Sturgis for Arrowhead, with the five spliced belts.

COLORS SALT FOR SALE

TORONTO.—Red, green and yellow salt will go on sale soon in local groceries. William Biton and G. S. Roden, who sold the patent rights, said the colored salt was decorative on the table.

The north magnetic pole is in Canada. 2383

Western Briefs**Riel Guard Dies**

MAPLE CREEK, Sask.—Phil Williams, 84, veteran of the Northwest Mounted police, died here. Born in Toronto, Mr. Williams came west at the end of the Riel rebellion. He was detailed to guard Riel and was present at his hanging.

Motorcycle School

CALGARY.—A motorcycle school for R.C.M.P. traffic officers has been established here. Motorcycles used before the war to help regular control were dropped when gravel roads were found to be dangerous. The highways now have been hard-surfaced and it is felt the machines will again be useful in this area.

Heading North

EDMONTON.—Edmonton police were unable to catch one runaway when a cow defied repeated attempts at capture. When the cow was first reported wandering the streets two policemen rounded her up and placed her in the police garage. She disappeared through another door and was last seen heading north.

Women and Wood-Winds

WINNIPEG.—John Hempseed, bassoon player with the Winnipeg Symphony Orchestra, says women and bassoons have similar temperaments. "Tell me what are the temperamental qualities of a woman," he says. "They are exactly applicable to the bassoon."

Shine For A Dime

YORKTON.—A new type of vending machine made an appearance on the street. It shines shoes for a dime. One brush applies wax and a second does the polishing. Bob Hart and Amos Border were seen trying to get a shine on one dime.

First Full Survey

EDMONTON.—A photographic survey of Alberta's entire 250,000 square miles is under way. The survey, to cost more than \$1,000,000, will provide valuable data, principally for the oil industry. Less than half the province has been accurately surveyed and mapped.

Blanc Mange

½ Cup Sugar

6 Tablespoons Canada Corn Starch

¼ Teaspoon Salt

4 Cups Milk

1½ Teaspoons

Vanilla

Mix sugar, Canada Corn Starch and salt in top of double boiler. Gradually add milk, mixing until smooth. Place over boiling water and cook, stirring constantly, until mixture thickens. Cover and continue cooking 10 minutes longer, stirring occasionally. Remove from heat. Add vanilla; cool. Pour into moulds or serving dish and chill. Makes 6 to 8 servings.

Other variations including Floating Island, Chocolate Blanc Mange, Custard Blanc Mange and Pistachio Blanc Mange are included in Jane Ashley's Recipe Folder entitled "For Finer—Delicious Desserts".

CANADA CORN STARCH

They're Simple—and
Simply Delicious
with **MAGIC**

MAGIC RAISIN SCONES

Mix and sift into bowl, 1½ c. once-sifted pastry flour (or 1½ c. once-sifted hard-wheat flour), 3 tps. Magic Baking Powder, ½ tsp. salt. Cut in finely 4 lbs. chilled shortening and mix in ½ c. washed and dried raisins and ½ c. lightly-packed brown sugar. Combine 1 slightly-beaten egg, ½ c. milk and a few drops almond flavoring. Make a well in dry ingredients and add liquids; mix lightly with fork, adding milk if necessary, to make a soft dough. Knead for 10 seconds on a lightly-floured board and pat out into greased pie plate (7½" top inside measure) and mark into 6 pie-shaped wedges. Bake in hot oven, 425°, about 18 minutes. Serve hot with butter or margarine. Yield—6 scones.

"There is really something to this

Formulation Story!"

"Farmers like you and me know from experience that the most effective weedkiller MUST contain FOUR important ingredients:

THE RIGHT OIL THE RIGHT COUPLER
THE RIGHT EMULSIFIER THE RIGHT ESTER

WEED-NO-MORE "80" has them all"
PLUS

A FIELD PROVEN FORMULATION—33 separate formulations were tested on 6,500 test plots. More than 100,000 individual readings were taken.

MORE UNITS OF WEED CONTROL PER GALLON—Contains 80 ounces of 2,4-D acid. 60% more than last year's product.

GREATER EFFECTIVENESS—Even under adverse weather conditions, its fast penetration assures excellent results.

SUPERIOR MIXING QUALITIES—The right ingredients in the right proportions account for its stability and easy handling.

LOWER COST—GREATER COVERAGE—Higher acid content gives you lower cost per ounce of acid. 2,4-D acid costs 46% less per ounce than last year. Gives you as much as 27% more coverage on small grains.

The Carbon Chronicle

United Church Will Observe 25th Anniversary

The 25th anniversary of the union of the Congregational, Methodist and Presbyterian churches is being celebrated next Sunday, June 11, in the form of a series of Rally Services. There will be no service in the local church next Sunday and all members and adherents of the United Church, with their families, are urged to attend the Rally Service to be held in Acme Memorial Hall at 11 o'clock next Sunday morning.

A choir, composed of the members of Beiseker, Acme and Carbon choirs, under the direction of Mrs. Margaret Berreth of Beiseker, will lead the congregational singing and provide special music.

As a large congregation is expected you are asked to be sure to be at the hall in good time.

The offering from all these services across Canada is to provide a fund to help finance the education of candidates for the ministry, as most of these come from homes which are not able to undertake the total expense required.

The congregation will gather for a picnic lunch together at the close of the service. Bring your lunch and enjoy the fellowship of this great gathering. The Acme ladies will provide tea and coffee.

The giant bingo night held in the Carbon Scout Hall last Wednesday evening netted \$171.52 for the Winnipeg Flood Relief Fund. Of this amount \$156.52 was raised from bingo and \$15.00 from the sale of hamburgers, hot dogs, coffee and pop by the I.O.D.E. A further sum of \$25.00 was received in cash donations. The entire proceeds have been forwarded to Winnipeg Flood Relief headquarters.

—Have you had any visitors during the past week? Have you been host to any of the local organizations? We would appreciate having these news items and stories for publication. Send them in or bring them to the Carbon Chronicle office.

CARD OF THANKS

I wish to express my sincere thanks to the Carbon Oldtimers' Association for the lovely flowers and my many friends for their kind visits while I was a patient in hospital.

Mrs. Jim O'Rourke

THIS FOUR GENERATION picture was taken at a recent celebration honoring Mrs. Helena Mary Skerry of Acme on her 75th birthday. Left to right are: her daughter, Mrs. Joe Raymond of Devon; seated, Mrs. Skerry; Mrs. Ken Swanson of Calgary, Mrs. Raymond's daughter, who is holding her own daughter, Linda.

Awards Presented In Essay Contest

Cash awards and essay prize certificates were presented at the Carbon school to nine pupils Tuesday afternoon for the best essays on "What Our Flag Means To Me." The essay contest was sponsored by Duke of York Chapter I.O.D.E. and presentations were made by Mrs. J.A. Barr. Regent, and Mrs. D. Gordon, Empire Study convenor. Award winners in each class were:

Grade 1—Albert Nowitzky.
Grade 2—Luann Ohlhauser.
Grade 3—Maxine Campbell.
Grade 4—Margaret Warren.
Grade 5—Robert Ohlhauser.
Grade 6 (Room 2) — Dennis Marshman.
Grade 6 (Room 3)—Dennis Barr.
Room 3—Wesley Warren.
Room 4—Dale Rott.

LITTLE NEWS ITEMS OF LOCAL INTEREST

Merle Anderson attended the recent Hereford Purebred Bull Sale at Lacombe and purchased Stanway Donald from Parsonage and Holmes of Innisfail for \$750.

Jim O'Rourke and son, Basil, left Monday on a three weeks vacation in California.

Mrs. Charlie Smith returned Sunday from Three Hills hospital, where she underwent a medical check-up.

The new foundation for the Masonic hall was completed Monday by a "gang" of Masons who worked diligently to finish the job in less than a day.
